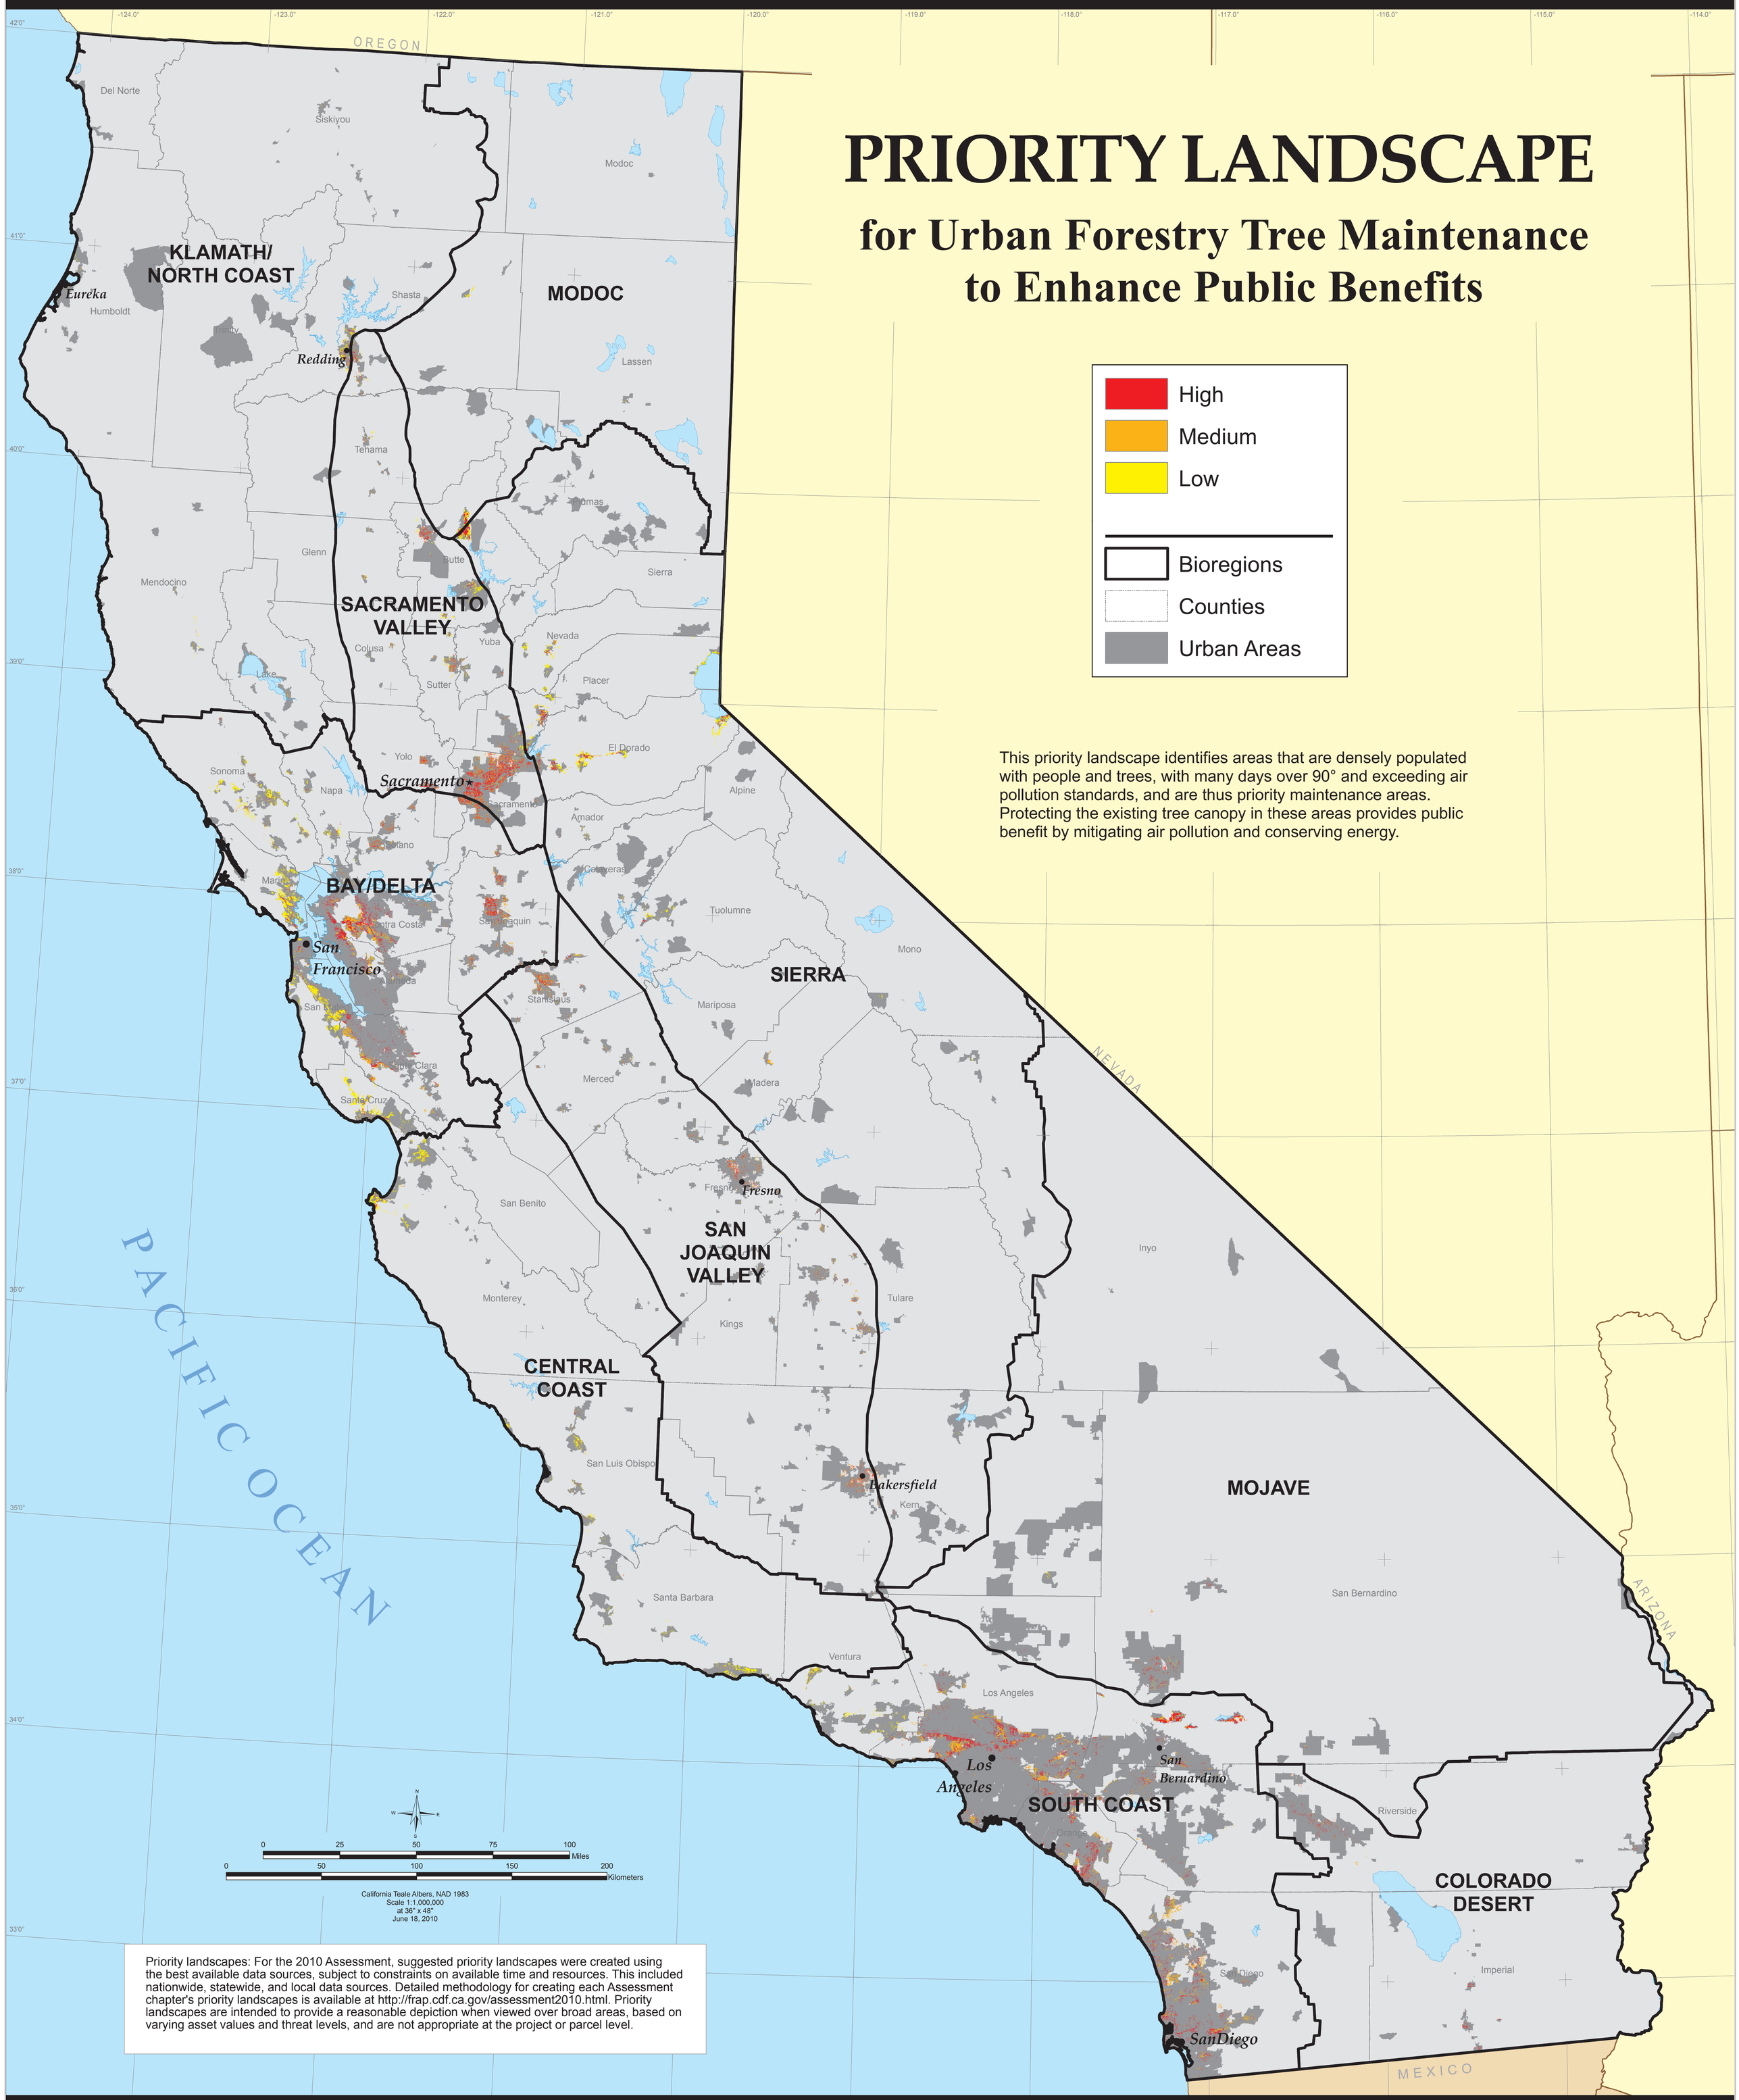
California's Forests and Rangelands:
The 2010 Assessment

Fire and Resource Assessment Program
California Department of Forestry and Fire Protection

STATE OF CALIFORNIA

PRIORITY LANDSCAPE

for Urban Forestry Tree Maintenance to Enhance Public Benefits



- High
- Medium
- Low
- Bioregions
- Counties
- Urban Areas

This priority landscape identifies areas that are densely populated with people and trees, with many days over 90° and exceeding air pollution standards, and are thus priority maintenance areas. Protecting the existing tree canopy in these areas provides public benefit by mitigating air pollution and conserving energy.

Priority landscapes: For the 2010 Assessment, suggested priority landscapes were created using the best available data sources, subject to constraints on available time and resources. This included nationwide, statewide, and local data sources. Detailed methodology for creating each Assessment chapter's priority landscapes is available at http://frap.cdf.ca.gov/assessment2010.html. Priority landscapes are intended to provide a reasonable depiction when viewed over broad areas, based on varying asset values and threat levels, and are not appropriate at the project or parcel level.

The State of California and the Department of Forestry and Fire Protection make no representations or warranties regarding the accuracy of data or maps. Neither the State nor the Department shall be liable under any circumstances for any direct, special, incidental, or consequential damages with respect to any claim by any user or third party on account of, or arising from, the use of data or maps.

Obtain FRAP maps, data, metadata and publications on the Internet at http://frap.cdf.ca.gov
