Total acres to be changed – 8176

Description of area and comments:

The area is covered wholly by grass which protects the soil from excessive erosion, retards runoff of water and accelerates water percolation. Its primary use is rangeland and is contiguous to watershed. The area receives about 12.00 inches of rain each year. The property is owned by a rancher that raises cattle. The new line to the South and North West are on roads and make the identification of SRA lands clearly identifiable to local jurisdictions.
